

managedIP Hosted

Untap the power of Unified Communications

When you choose *managedIP Hosted*, you're enabling employees to work everywhere they go, with everyone on every device they own.

Mobility

TDS *managedIP Hosted* is designed for employees living and working in an ultra-mobile world. You and your team can set up an office anywhere there's Wi-Fi, cell service or a data connection.

Collaboration

Not only can your employees work from anywhere with *managedIP Hosted*, they'll also collaborate like never before. Your team members can choose the communication tool that's best for the conversation, whether that's instant messaging, a high definition phone, video or conference call. Customers won't notice a difference if your remote workers call them; it will seem as if they are in the office.

Simplicity

TDS *managedIP Hosted* works with most smart phones, tablets, laptops and computers. Plus, it's ready to use on day one. Our implementation team will ensure your site is ready, verify your order, track equipment, and provide comprehensive training for your employees.

Better Tools. Better Collaboration. Better Business. TDS *managedIP Hosted*.

Key Tools

- **Instant messaging and presence**—Find out if your coworkers are free and what device they're using. Then, let your fingers do the talking! Send them an Instant Message right from your phone, tablet or PC.
- **Meet-Me Conferencing**—Host online conferences with as many as 125 people anywhere, anytime. Simple to use and easy to set up, you'll always be able to communicate with your entire team.
- **Softphone**—Turns any PC, laptop or tablet into a collaboration tool making multitasking effortless. Perfect for employees who consistently work remotely.
- **Call pull and call push**—Transfer active calls between your desk phone, mobile device and tablet without disrupting your conversation.
- **Video Calling**—Lead your team with individual, face-to-face video meetings using the cameras on your existing cell phones, tablets and computers.
